PROFESSIONAL SUMMARY

I am a Frontend Angular Developer with over 3 years of experience in creating a variety of applications, including ecommerce single-page applications, web ERP and CRM systems, and hybrid mobile apps using Angular and Ionic. Possesses foundational hands-on experience with .NET APIs and basic SQL database management. Proficient in working with REST APIs, I am enthusiastic about embracing new technical challenges and contributing to innovative projects in a dynamic team environment.

EDUCATION

Rajagiri School of Engineering and Technology   **August 2017 - June 2021**
Bachelor's, Computer Engineering   *GPA: 8.15*
- Completed a comprehensive curriculum covering software development, data structures, algorithms, web technologies and database management.
  Developed strong analytical and problem-solving skills through various projects and coursework.
  Engaged in collaborative team projects, enhancing communication and teamwork abilities.

SKILLS

Skills: Angular, Ionic, HTML/CSS, PrimeNG, Agile Methodologies, Git, JavaScript, TypeScript, Rest Api Integration

PROFESSIONAL EXPERIENCE

Aabasoft   **Kochi, KL, India**
Angular Developer   *August 2023 - Present*
- Project 1: SEALINK , Developed an ERP web application from the ground up, focusing on login, authorization, reports, vessel, and inventory modules
- Technologies used: Angular 15, RxJS, PrimeNG, REST API integration
- Project 2: VEDATMA , Contributed to a CRM project for a career counseling portal, providing maintenance and support, as well as implementing client requested updates
- Optimized APIs by debugging issues, performing basic MS SQL operations for fetch API requests
- Technologies used: Angular 10, .NET, MSSQL, REST API integration.

Aspire Systems   **Kochi, KL, India**
Software Engineer   *July 2021 - August 2023*
- Project 1: ICON iExpense, Created a user interface for a custom enterprise mobile application, achieving an 80% reduction in reimbursement management effort
- Technologies Used: Angular 12, Ionic Framework, Capacitor, HTML, CSS, RxJS
- Project 2: NATIONAL BANK OF KUWAIT, Developed a dynamic admin web portal for a Human Resources management system
- Technologies Used: Angular 13, HTML, CSS
- Enhanced code efficiency by building reusable components and services, and implemented lazy loading for improved navigation
- Project 3: UNIVERSITY OF HAIL, Designed a user interface for a customized mobile Human Resources management system
- Technologies Used: Angular 16, Ionic Framework, HTML, CSS, Capacitor
